INLINE SERVICE MOCK

```javascript
describe('ItemCtrl with inline mock', function() {
    beforeEach(module('notesApp'));

    var ctrl, mockService;

    beforeEach(module(function($provide) {
        mockService = {
            list: function() {
                return [{id: 1, label: 'Mock'}];
            }
        };
        $provide.value('ItemService', mockService);
    }));

    beforeEach(inject(function($controller) {
        ctrl = $controller('ItemCtrl');
    }));

    it('should load mocked out items', function() {
        expect(ctrl.items).toEqual([{id: 1, label: 'Mock'}]);
    });
```

GLOBAL SERVICE MOCK

File: notesApp-mocks.js

```javascript
describe('ItemCtrl with global mock',
    function() {
        var ctrl;

        beforeEach(module('notesApp'));
        beforeEach(module('notesAppMocks'));

        beforeEach(inject(function($controller) {
            ctrl = $controller('ItemCtrl');
        }));

        it('should load mocked out items',
            function() {
                expect(ctrl.items).toEqual([
                    {id: 1, label: 'Mock'}
                ]);
            }
        );
    }
);
```

```javascript
angular.module('notesAppMocks', [])
    .factory('ItemService', [function() {
    return {
        list: function() {
            return [{id: 1, label: 'Mock'}];
        }
    };
}]);
```
